

## Updating the Daily Tracker

The mySchedule application provides the data required to populate the Daily Labor Hot Sheet each day.

### Process

Administrators can extract the labor data from mySchedule and paste it into the Sales and Labor Hot Sheet in Excel. Printed copies of the Sales and Labor Hot Sheet can be distributed to department managers each day.

### From the main menu dashboard:

1. Click on **Reports**.

2. Select **Operations Weekly** in the drop down box.

3. Select **Operations Detail** from Report Drop Down box.

4. Select the **Export** radio icon.

5. Select **Running Man** icon to generate report.

6. Click on **Excel** icon to open the report.

7. The dialog box appears at the bottom of browser. Select Open to view the report.

8. After Excel opens in protected view, click on **Enable Editing** button to proceed.
